

SecureGUARD ISA120, IAG120

The ISA120 is the ideal solution for small office environments because of its compact dimensions. The forward-looking 64-Bit architecture and energy-saving design are only 2 outstanding attributes out of many.

Standard specification:

CPU: Intel 64Bit Mobile
Memory: min. 2048 MB
Hard Disk: 1x SATA 24x7
Ethernet: 3 - 5x 10/100/1000 NIC

Optional enhancements:

fanless design

SecureGUARD ISA800, ISA900, IAG800

The integrated LCD allows easy basic configuration and rapid rollout of the appliance without the necessity of connecting a monitor or keyboard. (2 CPU cores)

Standard specification:

CPU: Intel DualCore XEON / QuadCore XEON
Memory: min. 2048 MB
Hard Disk: 2x SATA2 RAID1
Ethernet: 2 - 8x 10/100/1000 NIC
Form factor: 19", 1U

Optional enhancement:

Performance: better CPU
Memory: 4096 MB RAM

SecureGUARD ISA950, ISA970, IAG950, IAG970

These appliances combine maximum performance with minimum height. Thanks to the power provided by the 4 CPU cores, it can also be used by a large number of users simultaneously.

Standard specification:

CPU: Intel QuadCore XEON
Memory: min. 2048 MB
Hard Disk: 2x SATA2 RAID1
Ethernet: 2 - 8x 10/100/1000 NIC
Form factor: 19", 1U
Features: Redundant power supply (950)
Remote Management (970)

Optional enhancement:

ISA/IAG970: Redundant power supply

SecureGUARD ISA1500, ISA1550, IAG1500, IAG1550

These models belong to the most powerful and high-performance appliances on the market. The ISA1550 with 8 CPU cores meets the highest demands of the security field.

Standard specification 1500:

CPU: 2x Intel DualCore XEON
Memory: min. 2048 MB
Hard Disk: 2x SATA2 RAID1
Ethernet: 2 - 8x 10/100/1000 NIC
Form factor: 19", 1U
Features: Remote Management

Standard specification 1550:

CPU: 2x Intel QuadCore XEON
Memory: min. 4096 MB
Hard Disk: 2x SAS RAID1
Ethernet: 2 - 8x 10/100/1000 NIC
Form factor: 19", 1U
Features: Remote Management;
Redundant power supply

SecureGUARD Blade Edition

The Blade Edition combines the power of 24 ISA800 appliances in one machine and with the 3+1 redundant power supplies it achieves a very high degree of reliability. Whether cloud-computing security, highest performance for classic security systems or multilevel firewall concepts: SecureGUARD is the right choice to deliver outstanding performance on small space.

Appearance and content of the interface are adjustable. Special images can be created for projects; this also includes 3rd-party applications.

Errors and errata excepted! As at 8/2009, product figures can deviate from the actual product!
